Background

University professor and researcher who has an extensive experience in teaching and research on complex systems science and engineering, network science, computational social science, mathematical modeling and simulation, artificial life/chemistry, and computer and information sciences.

Director, [Center for Collective Dynamics of Complex Systems \(CoCo\)](#)

[Google Scholar](#)

Education

- BS, MS, DSc, University of Tokyo

Research Interests

- Complex systems
- Complex dynamical networks
- Human and social dynamics
- Artificial life/chemistry
- Interactive systems
- Complex systems education
